TECHNICAL SKILLS

Programming Languages/Framework: JavaScript(Reactjs, Vuejs), Typescript, Storybook, PHP (Laravel, Lumen), Dart(Flutter), Graphql, C#, .NET

DevOps: Git, GitHub, GitLab, Bitbucket, Ansible, Docker,

Containerization: Docker, Kubernetes

Amazon Web Service: EC2, S3, IAM, RDS, Route 53

Programming Paradigm: Data Structure, Algorithms, Functional Programming, Object Oriented Programming

Database: MySQL, Postgres, Sqlite

Css framework & preprocessor: SASS, Bootstrap, bulma, tailwind

Test driven development (Jest, Cypress & PHP unit test for Laravel) & Redis cache

Others - Wordpress, Azure

EXPERIENCE

SOFTWARE ENGINEER
ELECZRA (02/2023 - present)

- Converting high-quality designs into pixel-perfect NuxtJS user interfaces.
- Implemented Google Authentication to enhance user access and security in alignment with industry standards.
- Developed efficient content transfer algorithms from Google Sheets to JSON files using Gulp.
- Enhanced application performance through effective caching mechanisms.
  Technology used: JavaScript, VueJS, NuxtJS,React,NextJs, TypeScript and Tailwind CSS.

LEAD FRONTEND ENGINEER
Sendchamp (04/2022 - 01/2023)

- Conducted Cypress-based UI automated testing to ensure product quality.
- Expertly managed sprints and project workflow using Jira.
- Integrated REST API and payment gateway functionalities to enrich the application's feature set.
- Deployed complex SEO configurations and integrated tracking tools for performance optimization.
  Technology used: JavaScript, TypeScript, ReactJS, NextJS, Chakra, CSS/Sass, Recoil, Cypress, CI/CD, Bitbucket, Jira,Netlify, and React Query.

SOFTWARE ENGINEER / CHIEF TECHNOLOGY OFFICER
Raadaa Partner International (12/2019 - 04/2022)

- Led a team of five professionals in the design, development, and deployment of a comprehensive financial services platform.
- Successfully refactored a substantial Vue.js codebase, enhancing modularity through abstraction and componentization.
- Proposed a sustainable deployment strategy for FINTECH applications.
- Designed and implemented an Orchestration flow for large-scale product exports to preferred customer locations.
- Ensured data integrity by leveraging relational databases and adhering to normalization principles.
- Designed and developed recruitment management and file management software applications for business enterprises, following a Modular Monolithic approach.
- Modularized applications into Composer packages to improve code reusability and streamline development.
- Employed Docker for containerization, enhancing portability and enabling deployment across various environments.
- Conducted thorough unit testing to ensure application reliability and functionality.
- Created SQL queries, stored procedures, and triggers using MySQL to achieve data replication.

Technology used: JavaScript, VueJS, ReactJS, NuxtJS, PHP 7, Laravel, CSS/Sass, Vuex, Redux, GraphQL, REST API, and CI/CD.

CERTIFICATION

Openclassrooms by **Andela - 10/2019**
Certificate in web development courses
- Design the Logical Model of Your Relational Database
- Build web apps with ReactJS
- Secure Your Web Application With OWASP
- Create Simple Prototypes With Wireframes
- Write JavaScript for the Web
- Learn Programming With JavaScript
- Manage Your Code Project With Git & Github
- Learn the Command Line in Terminal
- Build Your First Web Pages With HTML and CSS
- Create Web Page Layouts With CSS

EDUCATION

2016 - 2019 • Obafemi Awolowo University
Engineering Physics

2013 - 2014 • Cambridge A'levels
